

A Complete Contract Lifecycle Management Solution

HxGN Supply Chain Contracts™

HxGN Supply Chain Contracts helps organizations reduce risk, enforce compliance and drive contractor performance across every phase of the contract lifecycle.

Built for complex project execution, this fully SaaS, web-based platform supports the entire contract lifecycle—from scope development, sourcing and bid evaluation to change management, compliance tracking, progressing, invoice validation and closeout. Role-based digital workflows connect internal teams and external stakeholders on a unified platform, improving collaboration, minimizing risk exposure and providing clear visibility into obligations, budgets, milestones and performance metrics.

With embedded analytics and seamless integration into broader supply chain and project controls ecosystems, HxGN Supply Chain Contracts enables organizations to manage contracts proactively, make informed decisions and achieve successful outcomes on projects of any scale or complexity.

Driving Business Value

Web-based and secure, HxGN Supply Chain Contracts addresses the needs of owners, fabricators and EPCs by:

- Enhancing project profitability by improving contract administration efficiency, reducing overhead and eliminating unnecessary rework
- Enabling faster decision-making through real-time visibility into contract status, commitments, amendments and financial impacts
- Increasing competitiveness with accelerated sourcing and award cycles
- Driving contractor engagement with an intuitive, self-service portal, enabling efficient onboarding, document management and communications
- Controlling project risks with structured change management workflows, compliance tracking and claims avoidance
- Supporting global project execution with standardized contract workflows, centralized documentation and actionable performance insights
- Enhancing cash-flow by aligning invoicing and payments precisely with contract progress, deliverables and milestone completion
- Ensuring continuous improvement with comprehensive contractor performance analytics to benefit future sourcing and contracting decisions

Contractor Collaboration

HxGN Supply Chain Contracts delivers a secure, centralized collaboration portal to simplify subcontractor interactions and ensure alignment throughout the contract lifecycle. Teams can manage onboarding activities, track compliance documentation, exchange critical project communications and maintain ongoing dialogue

in a single location—driving clarity, enhancing transparency and reducing administrative overhead from contract initiation to closeout.

Sourcing & Qualification

HxGN Supply Chain Contracts streamlines contractor sourcing with collaborative prequalification workflows, centralized documentation and configurable selection criteria. With access to historical performance data and options for project-specific qualification, project teams can efficiently evaluate contractor suitability, accelerating sourcing decisions, improving quality and reducing project risk.

RFP & Bid Management

HxGN Supply Chain Contracts digitalizes the RFP process—enabling teams to issue bid packages, manage communications, collect responses and evaluate bids efficiently and transparently. Support for diverse order and subcontract types ensures alignment with project execution strategies, significantly reducing administrative complexity and improving the quality, transparency and speed of bid assessment and award.

Change & Compliance Management

HxGN Supply Chain Contracts provides structured workflows for early visibility and effective management of scope changes, claims and compliance deviations. Project teams benefit from transparent, auditable processes ensuring efficient and complete tracking of contract amendments, cost impacts, and performance issues. This structured approach mitigates project cost and schedule risk, enforces compliance standards and enhances contractor accountability throughout the project lifecycle.

Progressing & Invoice Management

HxGN Supply Chain Contracts streamlines contract progressing and invoice approval workflows by enabling precise tracking of deliverables, percent complete, and payment milestones against contract-specific terms. Control accounts and detailed cost code management at the line-item level ensure comprehensive financial oversight, improved payment accuracy, reduced administrative burden and stronger cost control across diverse contract types and project phases.

Closeout & Performance Evaluation

HxGN Supply Chain Contracts improves the contract closeout process through configurable workflows, checklists and comprehensive documentation tracking, ensuring compliance with all contract obligations. Integrated performance review workflows support input from multiple stakeholders to capture critical contractor metrics in safety, quality, schedule adherence and cost performance—providing actionable insights to guide future sourcing decisions, drive continuous improvement and elevate overall contractor accountability.

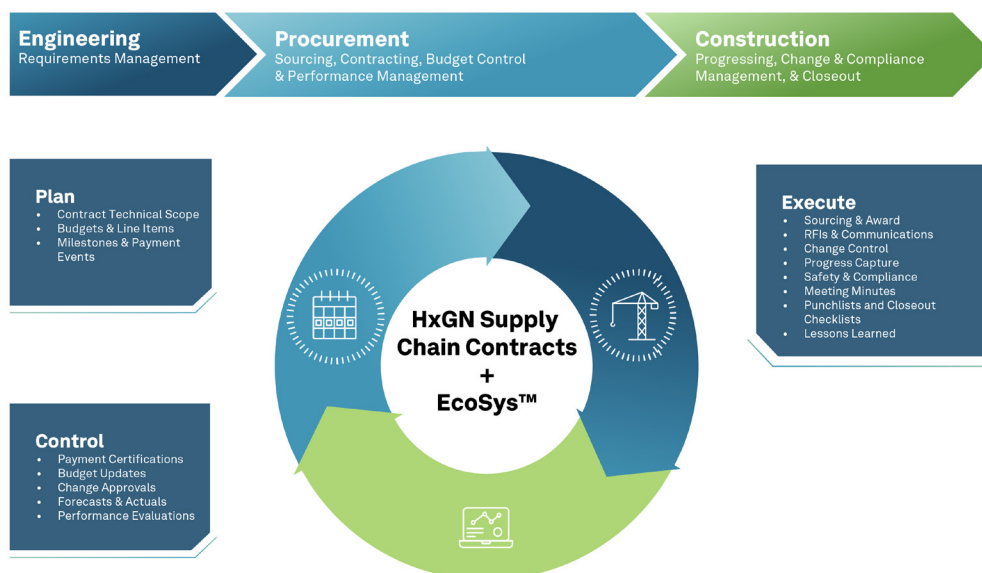

Total Project Control with EcoSys™

Fully integrated with HxGN Supply Chain Contracts, EcoSys™ provides unified project portfolio management, project controls and project management capabilities for capital projects and portfolios. By integrating key contract management processes—such as commitment tracking, change management and cost control—EcoSys enhances visibility into contract performance and financial impacts throughout the project lifecycle, driving improved outcomes, reduced risks and greater predictability.

EcoSys has been proven to:

- Drive better decision-making
- Increase predictability
- Enable the proper allocation of resources
- Quickly pivot resources when risks become reality
- Support more accurate budgeting and forecasting
- Improve budget visibility, leading to a 20% reduction in project cost overruns
- Increase project controller productivity by 25%

The EcoSys module for HxGN Supply Chain Contracts extends the capabilities of HxGN Supply Chain Contracts to deliver a complete project and contracts management solution for capital projects.

Hexagon is the global leader in precision technologies at any scale. Our digital twins, robotics and AI solutions are transforming the industries that shape our reality.

Hexagon's [Asset Lifecycle Intelligence division](#) helps clients design, construct, and operate more profitable, safe, and sustainable industrial facilities. We empower customers to unlock data, accelerate industrial project modernization and digital maturity, increase productivity, and move the sustainability needle.

Our technologies help produce actionable insights that enable better decision-making and intelligence across the asset lifecycle of industrial projects, leading to improvements in safety, quality, efficiency, and productivity, which contribute to Economic and Environmental Sustainability.

Hexagon (Nasdaq Stockholm: HEXA B) has approximately 24,800 employees in 50 countries and net sales of approximately 5.4bn EUR. Learn more at hexagon.com and follow us [@HexagonAB](https://twitter.com/HexagonAB).
